Example of installment program

Transaction spending amount	Installment term	Amount to be paid per statement
VND 9,000,000	3 months	VND 3,000,000
	6 months	VND 1,500,000
	9 months	VND 1,000,000
	12 months	VND 750,000

Illustration of displaying installments on the statement

- ✔ In the current statement period, you only have one original transaction converted to VND, which is VND 9,000,000.
- ✔ Suppose you convert that transaction into a 3-month installment with a conversion fee of 2%.
- ✔ In the next statement period:
 - Installment conversion fee = $2\% \times 9,000,000 = \text{VND } 180,000$
 - First installment amount = VND 3,000,000

For the following two statement periods after the mentioned statement, you will only have to pay the installment amount of VND 3,000,000 for each period.

Security with the most advanced technology

Vietcombank JCB Credit Card

You can be completely assured when using Vietcombank credit cards with the most optimal and advanced security methods and technologies.

EMV Contactless technology

The EMV chip card is a card with a microchip attached to the surface of the card with high data storage and security capabilities. Contactless technology helps you make card transactions quickly, safely, and conveniently with just one touch, thereby enhancing your experience and shortening payment time.

3D Secure security method

When you make online transactions at a 3D Secure merchant, Vietcombank will send a one-time password (OTP) via message or email for you to complete the transaction. 3D Secure ensures that only you, as the Cardholder, have the password to complete the transaction.

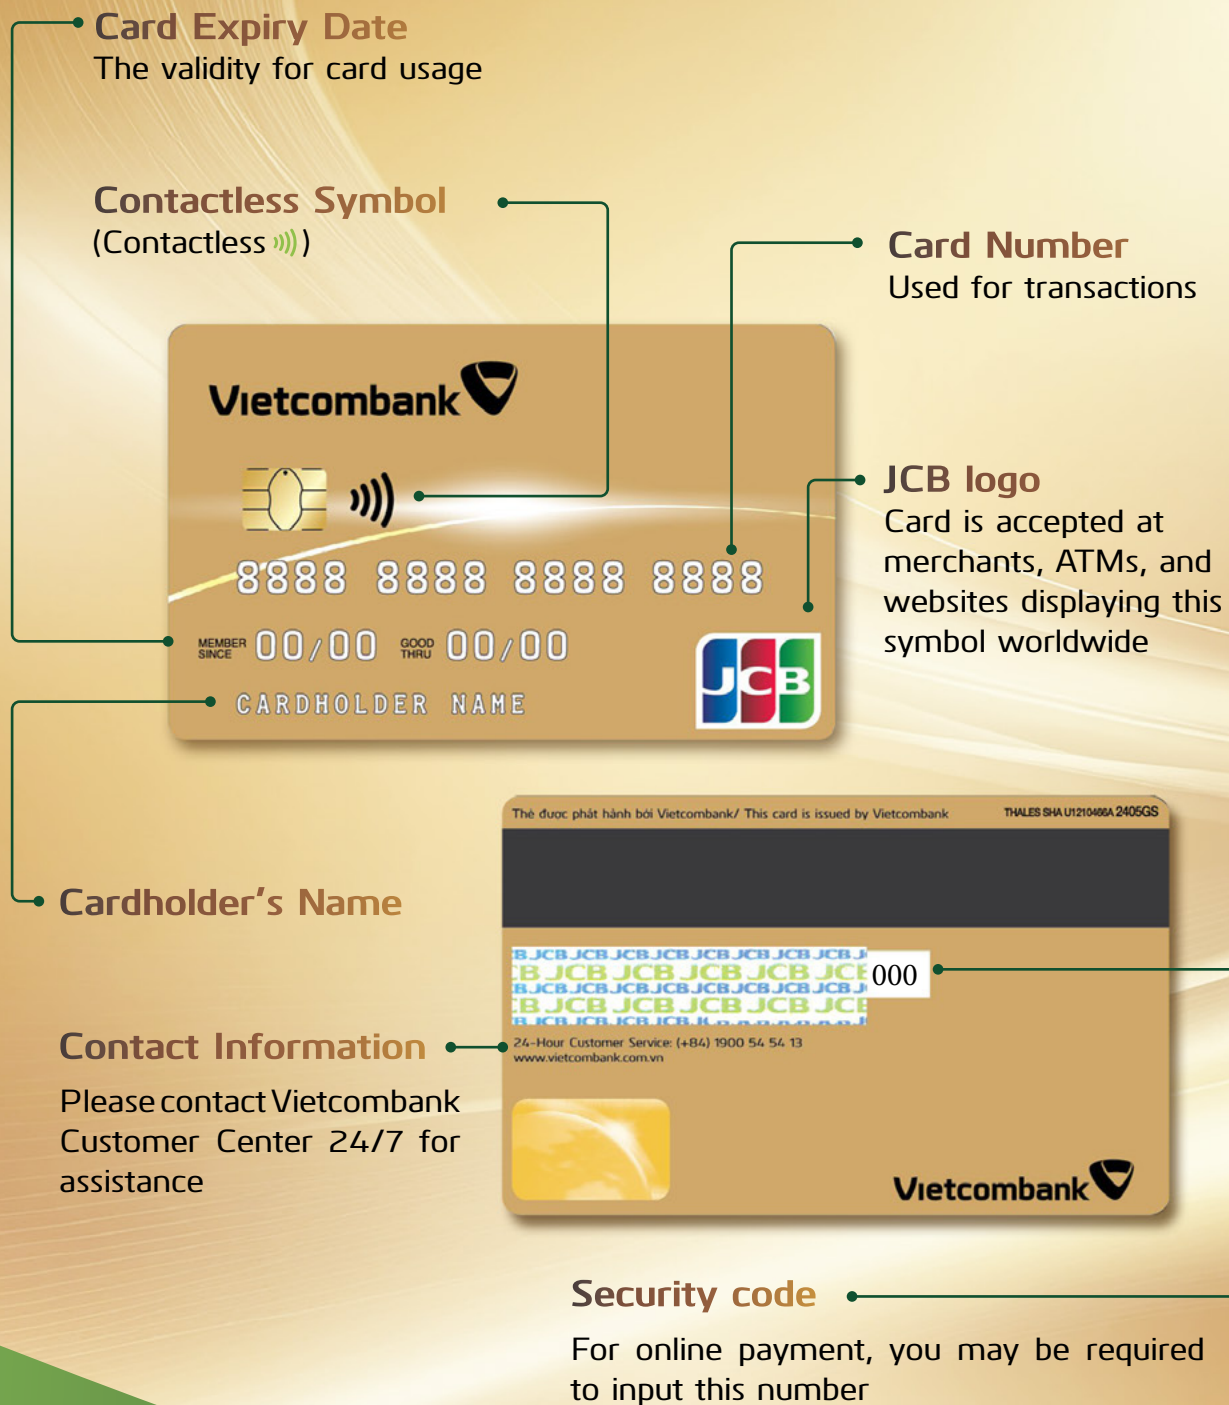

Tokenization

The actual card information (on the physical card) is encoded – turned into a different set of numbers (token) – to help protect your information when linking and using the card on payment/e-wallet applications on mobile devices/e-commerce websites. From there, your card transactions become more secure when carried out through electronic channels.
